AHT GLOBAL

LIFESTYLE TECHNOLOGY

THREE DISTINCT DIVISIONS, ONE UNIQUE EXPERIENCE

AHT GLOBAL

LIFESTYLE TECHNOLOGY

AHT Global is the world's leading technology integration firm specializing in the engineering, installation, programming and service of luxury entertainment and control systems. Established in 1996 as Advanced Home Theater, AHT Global has become an award winning technology firm catering to the residential, commercial and marine industries.

With 90 employees spread across five offices in Miami, New York, Philadelphia, Naples and Rendsburg, Germany, we are uniquely positioned to extend immediate white glove service to our clients wherever they live, work, travel and play.

We provide world-class customer service from the first meeting through to project completion and beyond. By cultivating the best and brightest technicians, programmers, engineers and sales professionals, AHT Global continues to exceed our client expectations every step of the way.

Architects, developers, designers, builders, homeowners, shipyards and businesses have come to rely on the technology expertise we bring to the table for each and every project. We welcome you to take a few minutes and explore how our group of professionals can help you with your next building project. Whether it be a home, yacht, residential high-rise or office building–we look forward to working with you and your design team to infuse AHT Global's signature 'Lifestyle Technology' into your project.

MISSION

AHT Global is dedicated to designing and installing technology systems built to the highest levels of quality, reliability and artistry, utilizing the finest bespoke luxury products. Our clients expect us to deliver the best, and our expertise and determination allow us to do so every step of the way.

AHT RESIDENTIAL
A DIVISION OF AHT GLOBAL

AHT Residential specializes in providing custom entertainment and home control systems that are simple to operate. Working closely with homeowners and their project teams of interior designers, architects and builders, AHT Residential ensures that technology systems are flawlessly integrated, on time and on budget.

AUTOMATION SIMPLICITY

Work smarter, not harder. That's the science behind intuitive automation controls. With a properly designed automation system, all functions of a home, yacht or business are simplified.

- Engineering
- Installation
- Programming
- Graphic User Interface Design

ENTERTAINMENT

World-class entertainment is much more than high quality audio and video components. A proper entertainment system requires foresight and planning.

- Media Rooms
- Theaters
- Video Walls
- IMAX Theater
- Listening Rooms

AMBIANCE

Ambiance and comfort play a key role in the design of a home, business or yacht. Incorporating a lighting, motorized shading and climate control solution adds to the comfort level in any environment.

- Lighting Automation
- Climate Control
- Motorized Shading

LIGHTING DESIGN

Architectural lighting design expertise is rare. Even rarer is a company like AHT that excels in both lighting design and lighting control. With fully accredited lighting designers on staff, AHT offers clients a unique, one stop experience for both lighting design services and dimming control systems.

- Architectural Lighting Design
- Lighting Fixture Specifications and Planning
- Lighting Plans, Layouts, Switching and Wiring Diagrams
- LED Fixture and Replacement Lamp Procurement
- LED Retrofit Services

SECURITY

Keep the ones you love safe with an integrated communication and surveillance system. All security features are combined in an easy-to-use interface that can be accessed from a handheld device or computer from anywhere in the world.

- Cameras
- Intercoms
- Door Locks
- Gate Control
- Phone Systems
- Biometric Entry Systems

INTELLIGENT EFFICIENCY

Automation not only makes life more convenient, it also helps homes, businesses and yachts conserve energy. By scheduling, monitoring and enabling smart systems to communicate in unison, energy usage is greatly reduced.

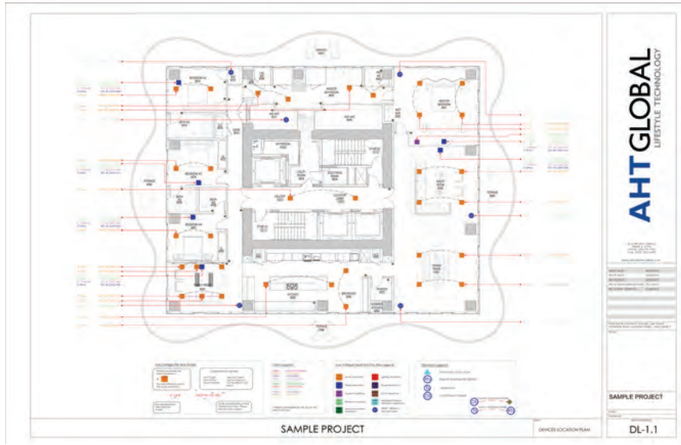
- Light and Shade Scheduling
- Thermostat Scheduling
- Automated Shading Based on Sun Positioning
- Load Shedding
- Occupancy Sensors
- LEED Certification

CRAFTSMANSHIP & RELIABILITY

From planning to implementation, AHT painstakingly evaluates every last detail of a project to ensure the highest level of craftsmanship. Our programmers, designers and technicians are world-class craftsmen.

When constructing complex integrated residential, marine or commercial control systems, reliability is not a luxury - it's a necessity.

AHT Global's Signature Monitoring system gives clients and guests peace of mind. All AV/IT devices in a home, yacht or business are monitored 24/7/365 days a year.



DEVELOPER TECHNOLOGY

AHT works with developers to design IT networks, audio & video systems, lighting & motorized window treatment systems and security infrastructure, forming a complete residential building technology system. This sought-after concierge technology enables developers to set their property apart from the norm. As a result, homeowners enjoy the latest in residential technologies the same day they move into their home, and developers outperform their competition by offering the most advanced buildings in the world.
